Anchor products are of superior design and operate best within the parameters of these instructions. It is IMPERATIVE that the instructions be carefully read and COMPLETELY FOLLOWED.

### CAUTION:

1. For each installation, the installer is solely responsible for evaluating the site and the proper securing method determined. Some soils require different staking or securing than that provided with the tent. Due to this variety of soil conditions, these are the manufacturer's suggested sequence of installation procedures. Anchor's responsibility is limited to the construction of the tent. We are not responsible for methods that installers may choose to secure the tent to the ground.
2. Inasmuch as the weather is unpredictable, good judgment and common sense must be incorporated within installation guidelines. It is the responsibility of the tent installer/maintainer to determine the severity of the weather, proper time and method of installation and/or erection and disassembly. Evacuation of the tent is recommended at any time weather becomes inclement. A successful event is a safe event.
3. Proper safety equipment should be used at all times to ensure a safe installation and take down. We suggest a careful examination be made to determine safety equipment needed, such as hard hats, steel toe shoes, safety glasses and other as required.
